

Retail Inventory Services

Managing your most valuable assets starts with knowing what and where your inventory is.

Determining the quantity of items that you have on hand within your stores and their price points is a necessary part of running an efficient operation.

With WIS International's help, you can complete your stock count process effectively and efficiently. For more than 60 years, WIS International has been providing inventory counting services to the biggest names in retail and manufacturing. You'll gain a better understanding of any shrinkage issues so that you can proactively manage your loss prevention processes.

Benefits for your business

Accuracy – You'll benefit from our attention to detail, audit trail and customised process. Our WISard™ data collection terminal has built-in alerts to assist WIS International auditors in providing accurate results and helps to eliminate common count errors.

Trained Workforce – Trained, direct employees provide the inventory expertise so that your employees can concentrate on running the business, not counting stock. With a large pool of trained inventory specialists available for your next project, you can rely on WIS International.

Technology – Technology is an important component of an accurate stock count. WIS International routinely creates customised proprietary software programs to meet our clients' needs.

The WISard™ data collection terminal allows for single-handed operations which facilitates a smooth and accurate count for your business. With the incorporation of Radio Frequency (R.F.) technology, the WISards™ provide more functionality so that scanned data is instantly accessible by management and our customers to provide an efficient and accurate stock count.

The use of R.F. technology provides real time insight into an inventory's progress. With R.F. technology, it's possible to:

- View real time percentage of inventory completion.
- Improve communication between crew managers and staff personnel.
- Obtain continuous equipment status updates.
- Improve rechecking / readjustment capabilities.
- Gain insight into shelf level data.

Project Management Expertise – Physical Inventory takes planning to succeed. With project management expertise that you can rely on, we'll take care of all the details to ensure flawless execution of your inventory. Account instructions are developed for each client, so that your specific needs are met.

What are people saying

"Very efficient, informative and very positive. Great morale and great team spirit"

"Went very well. xxxx and his team were very professional a pleasure to work with. The audit was one of the smoothest I have done"
